Abstract (en)  
The wing (1) comprises a panel (3) with a pair of front and back vertical faces (3a, 3b, respectively) delimited by a pair of lateral vertical surfaces (4a) and by an upper (4b) and a lower (4c) surface, and an abutment edge (8) projecting from the panel (3) at the two lateral vertical surfaces (4a) and at the upper surface (4b) of the panel (3) itself and having an abutment surface parallel to the vertical faces (3a, 3b). In accordance with the invention, said abutment edge (8) is made as a separate component distinct from the panel (3) so that it can be mounted on said panel (3) depending on the selected opening side of the door.
