Abstract (en)

[origin: EP1826486A2] The method involves supplying waste oil into a sample tank system (3), and checking quality of the waste oil existing in the sample tank system for pollutants. The waste oil is supplied to an internal-combustion engine (5). The waste oil is collected before supplying into a sample tank system in an accumulative tank plant (1). The waste oil is cleaned before supplying into the sample tank station e.g. charge wise. An independent claim is also included for device for energy utilization of waste oil.
