Abstract (en)
[origin: WO2006049754A1] A foot support (50) includes a foot supporting structure (58) having a lateral side (20) and a medial side (22). The foot supporting structure (58) is adapted to provide support to the underside of weight-bearing portions of a user's foot. An anchoring structure (59) beneath the foot supporting structure (58) is connected to the lateral side (20) of the foot supporting structure (58) and not connected to the medial side (22) so that the medial side (22) of the foot supporting structure (58) forms a cantilever arm projecting out from the lateral side (20).
