Abstract (en)

[origin: US2006130491A1] A child care storage for storing an infant food and/or product includes a plurality of functional compartments for refrigerating, heating and/or sterilizing the infant food and/or product in a main body, wherein the plurality of the functional compartments include a refrigerating compartment and a sterilizing compartment; and a control unit for controlling the plurality of the functional compartments. The plurality of the functional compartments includes a refrigerating compartment. The refrigerating compartment, partitioned by partitions in the main body, includes a refrigerating space capable of being opened and closed by a first door and refrigerates the refrigerating space by a thermoelectric element.
