Abstract (en)
[origin: WO2006063900A1] The invention relates to a crockery basket (5) for a dishwasher (1), comprising a base frame (6) which comprises a base surface (7) which is provided with an edge (8) which is raised on at least one side. The aim of the invention is to reduce, at least significantly, the risk of injury caused by pointed elements (9) and/or cutlery which project in an upward manner, in particular if the pointed end thereof is arranged towards the top, e.g. forks, steak knives, etc. As a result, the raised edge (10, 10', 10'') exceeds at least the height of the pointed elements (9) of the cutlery basket (5) which project in an upward manner and, optionally, the height of the cutlery which are pointed towards the top at least in a cutlery basket.
