Abstract (en)

[origin: WO2006066674A1] The invention relates to an active substance combination in cosmetic products for restructuring keratin fibers. The invention is characterized in that said active substance combination contains at least two active substances from at least two different groups of active substances which are selected among the group of protein hydrolysates and/or the derivatives thereof (A), the group of short-chain carboxylic acids (B), and/or the group of polyhydroxy compounds (C). Restructuring of fibers, especially keratin fibers, is significantly improved by using the inventive active substance combination.
