Abstract (en)

[origin: WO2006059939A1] A medical product is disclosed. The medical product basically comprises an accurately metered dose of a GLP medicament intended for pulmonary inhalation put into a moisture-tight, high barrier seal container. The medical product optionally also comprises a dose of insulin. The container is adapted for application into a dry powder inhaler. The dose loaded in the container, is intended for a prolonged delivery by inhalation to the deep lung where the active ingredients are absorbed into the system. Optionally the medical product also may comprise at least one biologically acceptable excipient.
