Abstract (en)

[origin: WO2006062740A2] The present invention provides for an adhesive patch that includes a flexible backing having a front side and a back side and a formulation positioned on at least a portion of the front side of the backing, in at least a portion of the front side of the backing, or on and in at least a portion of the front side of the backing. The formulation includes xanthophylls, a solvent that dissolves the xanthophylls, and a pressure sensitive adhesive. The present invention also provides methods of using the adhesive patch (e.g., treating acne or a pimple in a mammal; exfoliating the skin surface of a mammal; and/or improving the appearance of skin surface in a mammal). The methods include applying the adhesive patch of the present invention to a topical (e.g., skin) surface of a patient.
