Abstract (en)

[origin: WO2006069706A1] The invention relates to a sliding coating for winter sports equipment, which comprises a copolymer (I) and, optionally, a copolymer (II). The sliding coating for the winter sports equipment comprises a copolymer (I), which comprises 10 % or more propylene monomer structural elements, in relation to the total amount of copolymer (I) structural elements and 1 % or more of other olefin structural elements, in relation to the total amount of copolymer (I) structural elements. The sliding coating does not contain any copolymer which contains 50 % or more ethylene monomer structural elements, in relation to the total amount of copolymer structural elements.
