Abstract (en)

[origin: WO2006063370A1] The invention relates to a razor comprising a shaving head (2) provided with at least one shaving blade and at least one motor-driven shaving knife which oscillates in relation to the shaving blade, in addition to a covering (3) which covers the shaving head (2). The inventive covering (3) comprises recesses (5) which extend in a transversal manner in relation to the direction (6) of the oscillating movement of the shaving knife, whereby the longitudinal axes thereof form, with the direction (6) of the oscillating movement of at least one measuring head, an angle at least partially different from 90°.
