Abstract (en)

[origin: WO2006069636A1] The invention relates to a method for the production of concrete blocks or concrete slabs of varying formats and sizes, whereby concrete is filled into moulds (2) for several blocks or slabs, the surface layer of which or the facing concrete layer (3) of which has a base colour and the surfaces of which have regions of different colours, the concrete is puddled by means of vibration and/or tamping and subsequently hardened, whereby, before puddling, at least one portion of a pigmented and/or variously-pigmented and/or a colour- and/or various colour-containing finishing material is projected by means of at least one application device (4).
