Abstract (en)

[origin: WO2006064152A1] The invention relates to a device comprising two clasp bodies (81, 82) for receiving pins pertaining to safety belts. According to the invention, a first clasp body (81) can be stowed away in relation to a second (82) clasp body. The invention is characterised in that it comprises displacement means (38) that can automatically displace the second clasp body (82) in order to stow away the first clasp body.
