Abstract (en)
[origin: WO2006063751A2] The invention relates to a device and an associated method for testing the safety of a hydraulic conveying system or lifting machine, especially a hydraulic elevator system. Said device comprises at least one sensor that is mounted for measuring a pressure prevailing in the pressure transmitting medium (6) of the hydraulic conveying system or lifting machine, especially the hydraulic elevator system, and at least one additional sensor for measuring at least one other parameter of the hydraulic conveying system of lifting machine, said parameter being different from the pressure.
