Abstract (en)
[origin: WO2006066853A1] The invention relates to a position determination and regulation system for working devices (3) arranged on the working arms (2) of mobile machine-tools (1). Said system comprises at least one sensor (4) and an emission/reception unit (5). The determination and transmission of position co-ordinates (x, y) and/or an incline (f) of the working device (3) between the at least one sensor (4) and the emission/reception unit (5) are carried out in a contact-free manner.
