Abstract (en)
[origin: WO2006072339A1] The invention relates to a method for operating an internal combustion engine (1) with an exhaust gas turbo charger and a useful turbine (12), in addition to an exhaust gas post-treatment unit (18) that is arranged downstream from the useful turbine (12). According to the inventive method, when the pressure of the exhaust gas rises, a pressure regulating device (13,17) is adjusted in order to reduce the pressure in the direction of the opening position thereof.
