Abstract (en)
[origin: WO2006066531A1] The invention relates to a lighting device comprising at least one light-emitting diode and a cooling aggregate (400) for cooling the at least one light-emitting diode, wherein the at least one light-emitting diode is arranged on the cooling aggregate (400) and the cooling aggregate (400) is provided with at least one recess in which a mounting plate (408) equipped with electrical components is located. The invention also relates to a vehicle headlight comprising at least one lighting device of the aforementioned kind.
