Abstract (en)
[origin: FR2879728A1] The system has a heat exchanger (20) exchanging heat energy with a radiating surface (11) through a coolant fluid, and a heat exchanger (30) with a heat exchange surface (32). A power supply (60) supplies electric power to Peltier effect cells (250-254), each presenting cool and hot sides. The cool sides are in direct thermal contact with the surface (32). The hot sides are in direct thermal contact with fins (57) dissipating the heat.
