Abstract (en)

[origin: US2008266204A1] System (1) is provided for the creation of images, texts and information that are visible under incident light. The system (1) includes: at least one display (10); and one control unit (11) for the control of the display (10). The control unit (11) is connected with a display (10), and/or at least one sensor (13), and/or at least one second remote control unit (12) via at least one interface (110).
