Abstract (en)
[origin: EP1829622A2] A machine (10) is provided that includes an engine (40) that rotates an operating member (46). Each of the engine and the operating member is supported on a frame that supports each of the engine and the operating member. A shroud (50) is mounted to the frame independently of the engine and the operating member and the shroud substantially encloses at least a portion of the engine.
