Abstract (en)
A stapling device (1) includes a housing (20) pivotally attached to a base member (10) and having a channel (23) for receiving staples, a staple drive plate (26) slidably received in the housing and movable to drive the staples, a staple pushing device (60) includes a casing (61) slidably engaged in the channel of the housing and a pusher for forcing the staples forwardly toward the staple drive plate, and an actuating device (3) for actuating the staple drive plate to drive the staples. The staple pushing device may be easily and readily assembled into the housing, and includes a projection or protrusion (65) for detachably anchoring the staple pushing device to the housing.
