Abstract (en)
[origin: EP1830012A1] The two glass panels (4,5) are positioned behind one another, resting on a carrying element (15) with their lower edges. The rear pane (4) is glued to the textured vertical segment (21) of the holding element (15) and additionally provided with two conical recesses. A complementary shaped securing element (26) with flanged edges is inserted into the recesses and kept in position by two more conical elements (24) fixed to the unit with a central bolt. The front pane (5) is attached to an adhesive foil (6) surrounding the securing element (26).
