Abstract (en)

An animation continuously displaying frame comprising at least a framework, a picture sheet, a grating plate as well as a combination member composed of a round rotating member with an eccentric hole and a movably mounted motor; the picture sheet and the grating plate are assembled in the framework to change positions or angular positions of the picture sheet or the grating plate by means of the round rotating member eccentrically mounted on a rotating axle of the motor and driven by the motor, thereby an effect of automatically changing the pictures on the grating plate can be obtained.
