Abstract (en)
[origin: EP1830376A2] The device has a feed line (4) connected with multiple output contacts (18) over fuse-manifold (10) containing multiple fuses (14). A printed circuit board (2) on one side of which the feed line is provided is connected with fuse-manifold over a contact element (8). The output contacts (18) are provided on the side of the printed circuit board facing the feed line. The contact element has a plug-in contact element conductively connected with the feed line.
