Abstract (en)
[origin: DE102004063799B3] Wind deflector assembly (18) has tie bar (20) which can be adjusted from position touching the basis structure to the operating position. The assembly has two sliding drag hinges (34,36) connected to lifting spring (42) and through which a draw lever (32) is connected which is subjected to spring force and gets strained during the adjustment of wind deflector assembly and brings outside the operating mode.
