Abstract (en)
[origin: WO2006072227A1] The invention relates to a disinfection system that is used to disinfect liquids (4) in a container (6), comprising an immersion emitter (8) which is immersed at least partially in the liquid that is to be disinfected via an opening in said container (6) and which emits UV rays. According to the invention, the disinfection system (2) is provided with a safety cover (10) which is used seal the opening, the immersion emitter (8) being suspended thereon.
