Abstract (en)
[origin: EP1676938A1] Production of metal components with a surface oxide layer of one or more metal oxides $Me_1 y Me_2 z O_x$, $Me_1 O_x$ or $Me_2 O_x$, where a surface region is treated to produce impoverishment in at least one of elements Me_1 or Me_2 forming the above oxides. An independent claim is included for a component, e.g. a turbine, especially gas or steam turbine, especially a turbine blade or heat shield element.
