Abstract (en)

[origin: WO2006069689A1] The invention relates to a textile two or three dimensional fabric made of fibers and/or strips and materials that are capable of swelling, wherein the respective amounts of fibers and/or strips and materials, that are capable of swelling, contained in said fabric are such that the fibers and/or strips are enveloped by the materials that are capable of swelling and the cavities of the fabric in a swollen state are partially or fully filled with material-bonded water and aqueous emulsions of (co) polymers of at least one ethylenically unsaturated monomer MON are applied as materials, that are capable of swelling, to the fibers and/or strips.
