Abstract (en)  
The present invention relates to a compound saw which can switch between two working modes, namely, a mitre saw and a bench saw, more specifically, a compound saw with a saw blade guard opening apparatus. This invention provides a compound saw with guard opening means which enables the guard (208) to open gradually as the main body of the saw (207) revolves, the guard opening / closing smoothly and flexibly. It solves the problem existing in the present state of the art, whereby the guard may open gradually as the main body of the saw revolves. The invention thus features a synchronously opening guard unit a main saw body that can be turned over, high safety performance, long service life, etc.
