Abstract (en)
[origin: EP1832699A2] The key (10) has a key bit comprising a contact device for transmission of electrical signals between the key and a lock, where the contact device has two contact wires. The key bit has a bit hole (22) running parallel to its longitudinal extension. One of the contact wires is arranged in the bit hole, where the cross-section of the key bit is thickened in an area of the bit hole and the bit hole is limited by a circulating wall.
