Abstract (en)
[origin: EP1832941A1] The timepiece has an hour wheel (2) pivoted on a cannon-pinion, and a screw head (7) for indicating hour, where the screw head is far from the center of a movement of the timepiece. The screw head has a lower ring and an upper ring connected by a detent (11). The upper ring carries hour indication and comprises teeth (8a), which is in contact with the detent integrated to the lower ring and with correction levers (15, 16). The levers respectively comprises locking elements (15a, 16a) for coming in contact with the teeth of the lower ring when the teeth of the lower ring act on the upper ring.
