Abstract (en)
[origin: US2008299341A1] The invention relates to a three-dimensional laminate which can be used to make a rubber-based glove with improved transversal extensibility and elasticity, a method for the manufacture thereof, and said glove which is water-tight and also tight in relation to most household liquids. The inventive laminate defines an internal volume and comprises an internal support and at least one external rubber layer which adheres to said support. The internal support comprises an elastic non-woven structure.
