Abstract (en)
[origin: WO2006021879A1] The invention relates to a device (1) for the disassembly of a rail anchor (4), connecting a rail (2) to a sleeper (3) of a track, comprising two opposing tool levers (6,7), connected by a rod (12), operated with displacement about a pivot axis (8) by means of a press drive (10). A first tool lever (6) is connected to the press drive (10), coupled to the tool frame (9). A further tool lever (7) is defined at an upper end (20) by the pivot axis (8).
