Abstract (en)

[origin: WO2006083159A1] Assembly comprising a number of structural elements, a tube and binding material, wherein the structural elements are placed in a slab-like configuration, which configuration is defined by four slab sides and a thickness, wherein the tube extends along a face defined by the thickness and one slab side; wherein the binding material holds the slab-like configuration and the tube together in one unit, and wherein at least one end of the tube is accessible, such that a boom can be inserted therein for manipulating said unit.
