Abstract (en)
[origin: WO2006072521A1] The invention relates to a fuel injection valve for internal combustion chambers comprising a housing (1; 3) wherein at least one injection opening (15), through which the fuel can be injected into the combustion chamber of the internal combustion chamber, is embodied. The inner side of the at least one injection opening (15) and/or the external side of the housing (1) are provided with knobs (20) in the region of the outlet of the at least one injection opening (15), such that an attachment, in particular of coking particles, is no longer possible or is at least made visibly more difficult.
