Abstract (en)

This invention is a stand for displaying ceramic tiles (5) of the type that is commonly used to line walls and/or floors, the stand being of the type that is used in shops that sell these ceramic products, the aim of which is to improve its basic function by enabling the observer not only to see the ceramic tiles (5) that are on display directly, but also to see any of these pieces indirectly or virtually lining and decorating the surface of any environment. This display stand is characterised by the fact that it is provided with a body (1) that is equipped with the means for storing and displaying a large number of different ceramic tiles, with the particularity that this body is also equipped with a video screen (6) at the front, which is provided with a keyboard, a mouse (7) and a CPU that stores a computer program to display on the screen a variety of different virtual environments created with the real ceramic tiles (5) that are featured on the display stand.
