Abstract (en)
[origin: EP1834808A1] Picture lamella card has picture carrier (32) with upper part (34) and lower part (36) whereby upper part has sight opening (38) for picture provided on inner side of lower part. A removable lamella element covers a part of picture. Displacement element is connected with lamella element over displacement and synchronization mechanism. Clamping element (44) holds lamella element during removal of displacement element around first section and following release of lamella element during the displacement around another section.
