Abstract (en)  
The container has a plastic base (1) in which a fluid dropping device (2) is provided. A number of punching lines (21) are merged in the form of a radiation to a point (22) in the base. The lines are punched in the base from above or from the bottom side. The ends of the lines lie on the circular line. A pin is pierced into the base for emptying the container. Large gaps are formed between individual punching blades (23) and the pin.
