Abstract (en)  
[origin: DE202006004085U1] The profile has a sill attached on a top side of a front face of a vertically positioned standard profile of a wall. Two side flanges (2, 2') are designed in u-shape, and the flanges are connected with each other by a base bar (3). Mounting plates (4, 4') are adjustably guided into a region of the base bar in such a manner that a blade angle enclosed between the mounting plates and the base bar is variably adjusted.
