Abstract (en)

[origin: EP1835107A1] The holder has a knee lever arrangement (26), and two knee lever parts (27, 28) that are connected with one another in an articulated manner. The lever parts are connected with a furniture body (12) and with an upper flap part (22), where the arrangement is attached to a spring device. A control lever (30) is provided for controlling a pivoting position of a lower flap part (23) with respect to the upper flap part. The control lever is pivotably fastened to the furniture body and the lower flap part around respective pivoting axes.
