Abstract (en)
[origin: EP1835232A2] The oven has a cooking chamber door (5) for locking or releasing a feed opening of a cooking chamber. A pair of cooking chamber layers is defined in the cooking chamber, where a cooking goods carrier is arranged in the layers and is inserted in the cooking chamber by the feed opening. An identification unit (E1 to E5, G1 to G5) identifies the individual cooking chamber layers of the cooking chamber. The identification unit is designed or arranged at the cooking chamber door that is assigned to the cooking chamber.
