Abstract (en)  
[origin: EP1835363A1] The timepiece has a watch case on which a rotating bezel is pivoted. A toothed ring (8) having an internal teeth (9) is housed in an annular groove (6) in a middle (1) of the watch case, where the toothed ring is angularly integral with the middle. A click ring (12) is engaged in the rotating bezel, and includes a lower skirt (13) extending in the groove in the middle. The click ring carries a leaf spring (15) which is radially movable and elastically in engagement with the teeth of the toothed ring, where the click ring is angularly integral with the rotating bezel.
