Abstract (en)
[origin: EP1835787A2] The microwave oven has a cooking chamber (10), and coupling units (12, 14, 16, 18, 20, 22) for coupling microwaves in the cooking chamber. A set of sections (26, 28) accommodating a cooking goods carrier (24) are provided in the cooking chamber, where one of the coupling units is arranged between two adjacent sections. The coupling units include a blade antenna and coaxial cable. The coupling units are incorporated in carrier plates, which are formed from ceramics. An independent claim is also included for a cooking goods carrier inserted into two adjacent sections.
