Abstract (en)
[origin: US2006107062A1] The invention relates to a portable mass storage, so-called personal medium (1), comprising a personal mass storage in which data are recorded, and forming a gateway process (P) capable of being loaded in the random access memory of a host station (5), and of being able to configure this host station (5) to which the personal medium (1) is connected. The invention covers an information system comprising personal media (1), host stations (5), and servers (9) on which is recorded information corresponding to user spaces belonging to the titular users of the personal media (1).
