Abstract (en)
[origin: EP1836916A1] The assembly has a removable sole element (11) fixed on an incomplete sole (1) of a ski shoe type rigid rod. The element has a hook (15) cooperating with a front part (2) of the sole, and is suitable to complete the incomplete sole so as to form a sole that is compatible with an ISO 5355 standard of a ski shoe and an ISO 9253 standard of a trail running shoe. A locking and fixation mechanism (3) locks the element under the incomplete sole, where the shoe is made of a plastic material.
