Abstract (en)

[origin: EP1836917A1] The bracelet has a length adjustable link (38) e.g. metallic cable, with ends defining fixed fixation points (48, 54), and a stopper (34) with a through hole in which the link pass. A fastener (50) is associated to the point (48), and the link is fixed to the stopper via the point (54) using a fixation unit (44). The link is engaged in the hole to block the link in a variable cut-off point (46) by a disengagable blocking unit (42) or slide the link when the unit (42) is disengaged. The link has a variable fixation point (56) located at a mid point between the point (54) and the point (46). An independent claim is also included for a stopper comprising a body.
