Abstract (en)

[origin: EP1837062A1] The book has a set of papers (2), in which sides of each paper carries a design representing a person, animal or small scenery with a short text. A locomotion device is constituted of wheels (4) driven by a motor e.g. friction motor. The wheels are mounted on a middle paper (1) of the book using a chassis (7). The papers (2) comprise indentations for permitting closing of the book by forming a wheel housing letting the wheels free from turning.
