Abstract (en)

[origin: EP1837145A1] The device has a conveying device (2) for conveying of processed, plate shaped work piece and a retaining device (8), which connects the press beam (6) with the conveying device over a guiding device. A pressure device (4) has a press beam for printing of the processed, plate shaped work piece. The retaining device connects the print bar with the conveying device over a guiding device. The conveying device has a slide tilting element (10) arranged in reference to the press beam, which has a slide tilting surface (10'), which runs in slanting manner in the direction of the conveying device.
