Abstract (en)

[origin: EP1837454A2] The arrangement for the covering of a joint (1), especially between floors, has at least one cover component (3) for the covering of the joint, at least one mounting device (4) to hold the cover component, and at least one fastening device (5) for the fastening of the cover component on the mounting device over the joint, whereby the fastening system has a magnet system (5',5"). The cover component is height-adjustable, and also has at least one wing (3') protruding to the side.
