Abstract (en)  
[origin: EP1837456A2] The arrangement has a profile unit (1) e.g. square pipe, with a wall having a connecting hole, and fixed at a rail section (11). A laminar connecting unit (5) with a passage opening is fixed at another rail section (12). A screw (7) is engaged at the profile unit and the connecting unit. The profile unit and the connecting unit are designed as a single unit with respective rail sections. The profile unit and the laminar connecting unit are oriented vertically and extend over the entire height of the respective rail sections. The profile unit and/or the connecting unit is made of plastic.
