Abstract (en)

[origin: EP1837461A2] Mounting (10) comprises a mounting plate (12) fixed to a flat support by screwing a central body (20) connected to the support plate. The central body has a guiding bushing (24) bearing a locking body (15) and having a radially connecting traverse bushing (22) into which a closing cylinder (30) is inserted. Preferred Features: The traverse bushing guides the closing cylinder which has parallel flat parts (36) on which lie stops (43) located in the central body. The locking body has two pairs of radial grooves (35) lying diametrically opposite each other in its lower region on the outer periphery.
